

HOW DO I ADD ADDITIONAL PRODUCT IMAGES?- V5

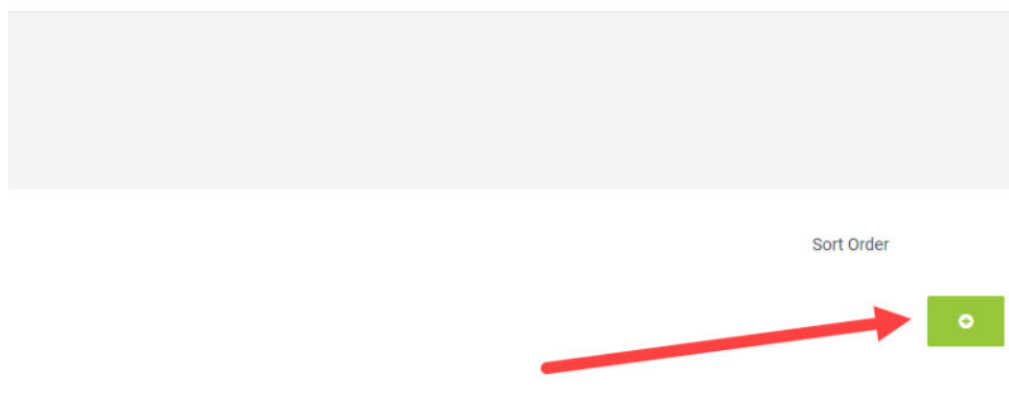

To add an additional product image go to menu **Products > View Products** menu. Once clicked on this will display all products available in your store.

To edit a product click on the **"pencil icon"** on the top right hand side of your screen.

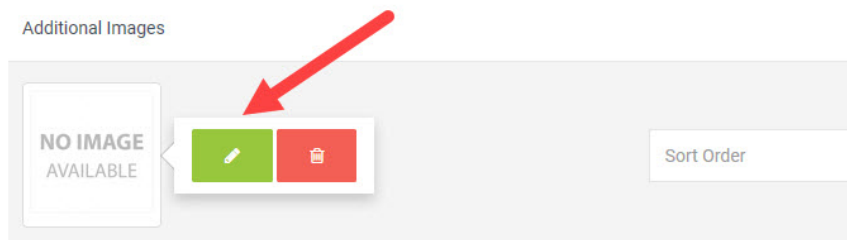

The product screen is split into tabbed sections: **General, Specifics, Connect, Features, Variants, Images, Promotions, SEO**. Click on the tab called **"Images"**.

Now Click on the **plus symbol icon** under the section *"Additional Images"*. Once you have clicked on the plus icon a new section will appear to add your additional images. *(you can repeat this step for multiple additional images)*

Click on the **"no image"** image and you will see a **pencil icon** appear. Click on the pencil icon and a new pop-up box will appear.

Move your mouse over to the third **"(up arrow) icon"** and click on it. You can then select a local image from your computer and upload it to your store. This will be your additional product image for this product. Make sure you **save your product** after adding the additional images.

You can also set a sort order number for your additional images.
